

## Automatic juice carton filling and sealing machine

**Technical parameters:**

Productivity'	2200-2500box /hour
Filling Range	200ml
Package shape	标准型 standard shaped
Package material	PET/PAPER/PE/AL/PE/PE
Electric power	7kw
Voltage	220V/380V
Air Consumption	0.4-0.8m <sup>3</sup> /min 1.0Mpa
Weight	1800kg
Measurement	3800X1900X3500mm

Functions and Features
The machine is suitable for filling juice, dairy
The machine Automatic Form Feed –sterilize –filling –shaping – sealing
PLC human control, Human - Machine Interface with English and Chinese display. Intuitive operation and Low Fault rate
Automatic finished all the job step, which includes run over the scroll reposefully, batch number, stick plastic tape, chemical and physical sterilizing, roll into cylinder, filling material, sealing-off, molding, cutting and horn-shaped.
The forming system we choose our own patent rectangular forming method instead of roundness system which use by Tetrapack, this system made the running much more stable, the function much more reliable, the exterior appearance of the product much perfect.
Sterilization: Hydrogen peroxide
