## 3. Structure and feature

The machine has the equipment which has a allocation, frequency conversion and timing , hydraulic pressure, water cooling. It is controlled by PLC, with the malfunction -control set .avoid the roller from stopping turn, it will eliminate the malfunction itself and given an alarm advance.

## 4. Technical Parameter

Model	25	80	100	120
Output Capacity (KG/H)	3-8	20-60	30-80	40-100
Hopper Volume (L)	1	3	4	5
Roller Size (mm)	100(D)×40(W)	200(D)×80(W)	200(D)×100(W)	200(D)×120(W)
Max. Pressure (T)	5	10	10	15
Roller Speed	Adjustable			
Feeding Speed	Adjustable			
Power	3	8	9	11
Speeding	Adjustable
