

300A New type transparent film (three-dimensional) packaging machine(also called tobacco packing machine)

USES:

This machine is widely applicable to the automatic film packaging (with gold tear tape) of various single boxed articles, such as the medicine, health products, foodstuff, daily cosmetics, stationery articles, and audiovisual products.

Performance Characteristics

This machine is a packing machine of new generation in light of the consideration of various shortcomings in which domestic traditional cigarette packet packing machine was refit to transparent film packing machine. It is a great outcome through many-year elaborate after the application of many patented technologies by our factory, which aims at the requirement from the user who requires for a variety of changes in sizes of packing boxes, with main characteristics as follows:

1. No need to regulate the height of two work tops of the machine when the mould is replaced, no need to assemble or dismantle the material discharge chains and discharge hopper. Reduce the replacement time of the mould four hours to the present 30 minutes.
2. New-type double safeguard mechanisms are used, hence other spare parts will not be damaged when the machine runs out of step without the stop of the machine.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
10. Original unilateral hand swing device to prevent from shaking the machine adversely, and the non-rotation of the handwheel during the running of the machine can secure the security of the operator.
11. New-type double-rotary film cutting cutter can ensure no need to mill the blade during many-year use

of the machine, which overcomes the defect that the traditional stationary single-rotary film cutting cutter was easily worn.

Main Technical Parameters:

Packing Material	BOPP film and gold tear tape
Packing Speed	40~80packs/ minute
Packing Size	Min. 30*20*1.2cm Max.(L)240(W)120(H)60 mm
Electric Supply & Power	220V 50Hz 5kw
Weight	500kg
Overall Dimensions	(L)2000(W)700(H)1400mm
